Project Progress Report

Our group project is progressing well, and we have established effective collaboration tools and processes. Here are the key points:

1. Collaboration Tools:
   - Communication: We will use Discord for voice chat to facilitate real-time communication.
   - Integrated Development Environment (IDE): Visual Studio Code (VS Code) will be our chosen IDE.
   - Live Share Extension: We will utilize the Live Share extension in VS Code to enhance collaborative coding.

2. Version Control and Production Readiness:
   - GitHub: Our code will be saved and managed on GitHub, ensuring version control and facilitating production readiness. All our project documentation will also be maintained on GitHub.
   - Google Test Extension: We will use the Google Test extension for VS Code to run and manage our tests, ensuring code quality and reliability.

3. Project Planning:
   - GANTT Chart: We have plans to create and utilize a GANTT chart to manage our project timeline and milestones effectively.
   - Role Refinement: We will continue to refine and define our roles to ensure efficiency and clarity.

4. Running Document for Links:
   - We are maintaining this running document specifically for relevant links, such as the GitHub repository and other important resources.

These steps will help us streamline our workflow and ensure successful project completion.

Meeting times & Group Organization

Objectives:
- This could be a running document/list to keep track of communication & progress
- Discord application for daily text communication and organization
- Weekly live voice chat using Discord to stay on the same page

Name	Communication Preference	Group Role
William Denson	Weekends any time/ weekdays (Prefer Fridays) after 8PM	Administration/facilitator
Taylor Montgomery	Weekdays after 8PM Weekends depend, we need to talk about each one prior.	PM
Cesar Ortiz Machin	week days after 7PM / weekends any time	Back End Developer
Constantine Ewan	Week days after 8PM CST Weekends at noon	System analyst/facilitator
John Parker	Weekdays after 7pm Weekends after 1pm	User Experience
Riley Pence	Weekdays after 10pm EST Weekends any time (Lives on West Coast)	GitHub Master
